

## OUR EXPERTISE

STRATEC Data Solutions is a world leader in the development of laboratory software. For more than 3 decades STRATEC Data Solutions has provided software systems to laboratories, diagnostic companies and instrument manufacturers throughout the world.

### OEM SOFTWARE

Create additional functionality within your analyzer or offer a branded middleware package to the laboratory via the STRATEC Data Solutions OEM software.

We have long standing partnerships with many of the world's leading diagnostic companies.

Embedded Software - the pressure is on, users expect the instrument to do a lot more than simply produce a result. STRATEC Data Solutions provides fully embedded core data management functions inside some of the world's most successful lab analyzers. Seamlessly.

### FULL SYSTEM SOLUTION

The demands of running a compliant, highly-efficient laboratory operation, presents a challenge!

Whether you are a small laboratory or a laboratory processing 20,000+ samples per day we can offer support. Linking multiple instruments, collating results, managing reflex and re-testing and tracking quality control, are just a few of the services we offer.

Some of the world's busiest laboratories trust STRATEC Data Solutions to develop and install customized software solutions.

### MIDDLEWARE-OPEN "OFF THE SHELF" SOLUTIONS

Robust, intuitive, scalable software designed to improve laboratory workflow, maximize efficiency, improve compliance and quality control.

Modular software with the ability to function as a complete operational support suite and the flexibility to grow with your laboratory needs.

Minimal configuration required in the laboratory.

Solutions which are supported by our technical team either onsite or remotely.

High quality proven solutions with over 5,000 systems deployed worldwide.

## FLEXIBLE LABORATORY SOFTWARE SOLUTIONS

## FLEXIBLE LABORATORY SOFTWARE SOLUTIONS

**aurora** Aurora is the core of STRATEC Data Solutions product portfolio and is easy-to-use with a broad range of functionality, e.g. Interfacing laboratory analyzers, acting as a complete laboratory information system, or even as a cost-effective LIS "light" solution.

Aurora is 510k cleared by CBER, CE marked, and can operate in several capacities within its labeling. Aurora is available as an "off-the-shelf package" or in situations where this does not have the desired functionality and scripting alone cannot accomplish the task, our experienced development team works with partners and laboratories to customize the best solution.

### STRATEC DATA SOLUTIONS

STRATEC Data Solutions is a dedicated software house specializing in the provision of laboratory software and data management systems for the diagnostic and blood testing industry worldwide.

Established in 1983 as Sanguin International, STRATEC Data Solutions has almost 35 years' experience developing software for the donor center and blood bank arena. As such, we have a core competence in providing customized software solutions to meet specific operational needs within high volume donor screening laboratories.

Whether you are a laboratory user or an OEM partner, with over 5,000 systems placed worldwide you can be confident that our solutions are proven. Innovative design with three decades of experience, places STRATEC Data Solutions services in high demand especially where tightly controlled front end function has to blend with "back office" configurability.

Some of these solutions include but are not limited to; managing and preventing positive samples from being pooled for NAT, electronic transfer of SPE images, NAT pooling applications including 1, 2, & 3D pool resolution, flexible NAT pool sizes and customized communication with blood establishment donor systems.
